

## STABILO SMALL Pedelec Direct Power

### Tricycle with electric motor

STABILO SMALL Direct Power is a tricycle with a powerful auxiliary motor that gives you a nice feeling of constant tailwind and makes you self-reliant and ensures your continued mobility.

The tricycle is equipped with a speed sensor which, together with a throttle, ensures that the motor only works when you push the pedals. In other words, you must work before you can relax. You control the power of the motor in 3 levels and it switches itself off at 20 km/h. The tricycle has start-up help of up to 6 km/h.

The driving distance of a fully charged battery is up to 30 km. If you do your bit, in combination with favourable wind and weather conditions, you can usually achieve an even longer distance.

The Stabilo Small Direct Power is especially known for its comfort, durability and formidable roadability:

- » Strong electric motor activated by a speed sensor at the pedals
- » Smart LCD display and removable Li/ion battery
- » Easy to get on and off and safe to drive
- » Comfortable sofa seat which is easily adjusted
- » Extremely strong construction and a long working life of more than 10 years
- » 7 gears with/without reverse function
- » We tailor the tricycle to your specific needs and deliver it within 15 business days

We recommend STABILO SMALL Direct Power for those who are walking-impaired or feel unsafe when getting on an ordinary bicycle – and for those who just want a different kind of bicycle.

# Specifications

## Dimensions

Length: 165 cm  
Width: 66 cm  
Mounting height: 17 cm  
Wheel size: 20"

## Bicycle weight

50 kg
