

## DUO REHA

### Side-by-side tricycle with rehabilitation function

DUO REHA is tricycle which is particularly suited for rehabilitation and training

On the DUO REHA model the driver and passenger push the pedals independently of each other and in the same gear. The driver forces the pedal motion in the passenger side which is important in the rehabilitation of walking-impaired users. This function can be easily disabled to allow the passenger to rest during the bicycle ride.

The REHA is also available with an electric motor which we would recommend – and all models can be tailored to your specific needs.

Like our other models, the DUO REHA is particularly known for its user-friendliness, flexibility and formidable roadability:

- » Easy to get on and safe to ride
- » Comfortable sofa seats which you can easily adjust forwards and backwards
- » Driven by both back wheels via rear axle differential
- » Extremely strong construction and a long working life of more than 10 years
- » Recognised rehabilitation aid

# Specifications

## Dimensions

Length: 197 cm  
Width: 98 cm  
Entry height: 22 cm  
Wheel size: 20"

## User measure

Min. measure inside leg: 55 cm

## User weight

Max 2 x 120 kg

## Tricycle weight

72 kg
